

HEXASTATE:

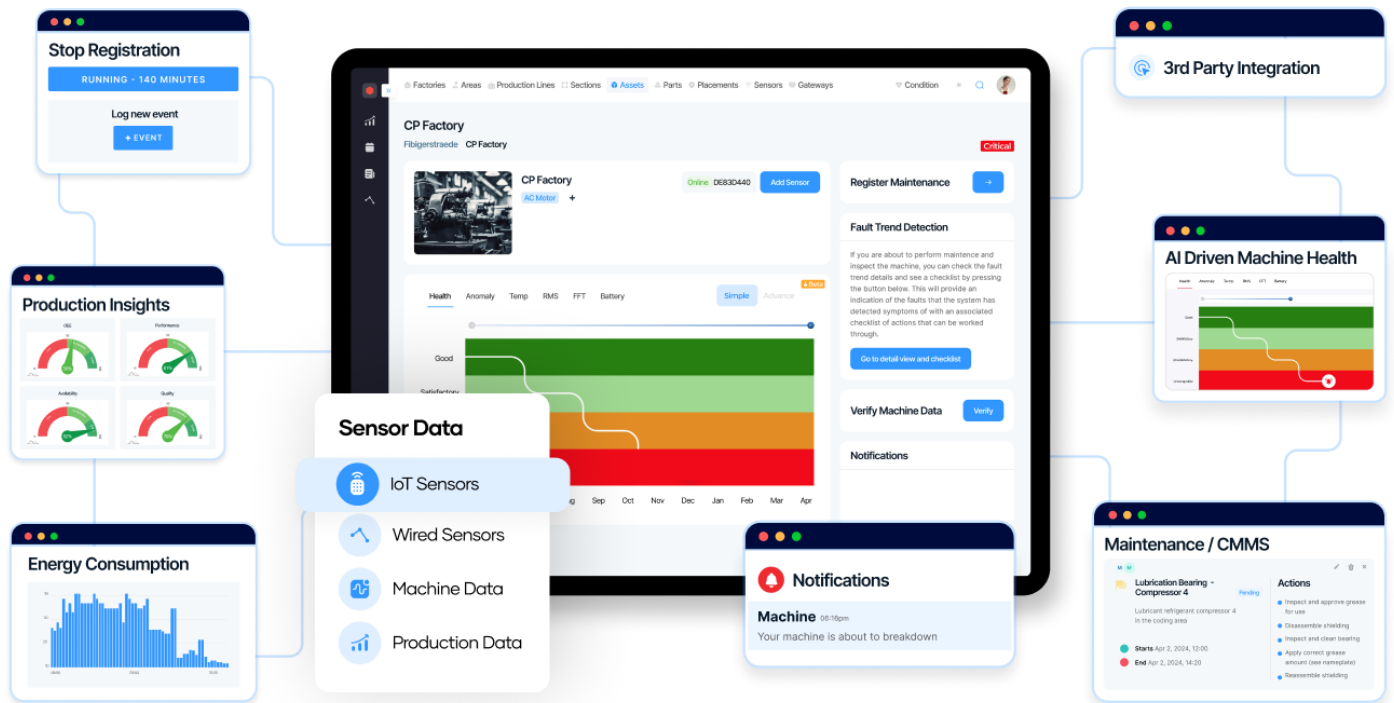

SMART SOLUTIONS

for Manufacturing Companies

Maintenance Management

HEXASTATE:

Our Mission: One platform for it all

Hexastate delivers smart automation technology, enhancing operational efficiency in industrial manufacturing with AI-driven monitoring, predictive maintenance, and strategic decision-making tools to reduce downtime and cut costs.

Company

Founded in 2018

Core

Intelligent software for manufacturing, facilities and utility

Markets

Scandinavia, Europe & UK, South America, USA, Asia

HEXASTATE:

Elevate Your **Maintenance Strategy** with Hexastate

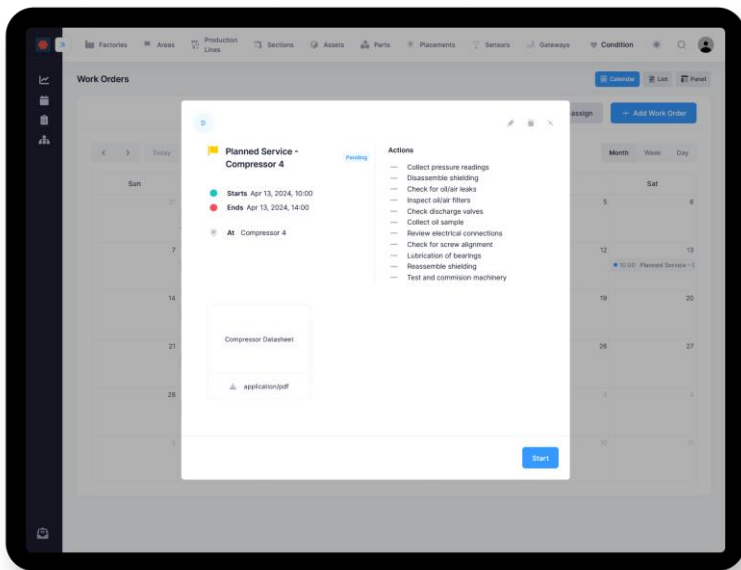

The diagram illustrates the integration of external systems with the Hexastate Cloud maintenance module. On the left, three icons represent personnel, equipment, and 3rd party systems, with dashed lines indicating data flow into a central box. This box, labeled 'CLOUD HEXASTATE:', states: 'Personnel, equipment and 3rd party systems feed real-time data into the maintenance module - ensuring an up-to-date and responsive workflow.' To the right, a tablet displays the software interface. A blue callout box at the top right of the tablet reads 'Easily Manage Maintenance Tasks Using data-driven insights'. The interface shows a 'Work Orders' section with a list of tasks such as 'Lubrication of Bearing on AC Motor AX3102' and 'Cleaning and refilling'. A detailed view of a task is shown on the right, including a description, a list of 'Actions' (e.g., 'Check the motor's model and serial number'), and a 'Start' button.

Empower maintenance efficiency and decision making through insightful maintenance data

- ✔ **Coordinate and track** tasks with ease, ensuring timely completion.
- ✔ **Schedule preventive measures** automatically, to reduce equipment failures.
- ✔ Maintain detailed logs to **assist decision-making** and compliance.
- ✔ Predict future maintenance needs to **manage resources** more effectively.
- ✔ **Empower existing workflows** with an intuitive interface that simplifies maintenance management.

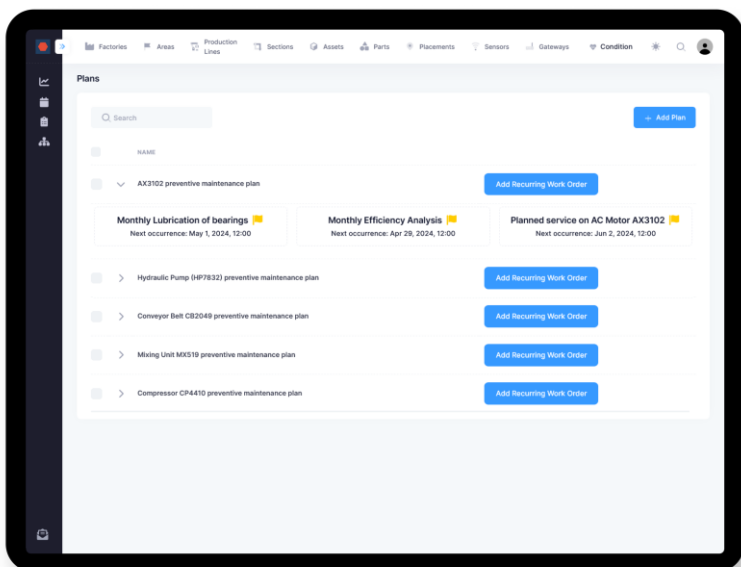

HEXASTATE:

Maintenance Insights Made easy

Work Order Management

- ✓ Hexastate's Maintenance module allows you to **work smarter, not harder**. Managing your maintenance resources will be smarter than ever.
- ✓ Ensure work orders are performed in the right order for maximum efficiency, with **easy prioritization of tasks**.
- ✓ **Edit and re-schedule** work orders with just a few clicks.
- ✓ Easily **include relevant files** directly in your work orders to improve workflows and minimize downtime.

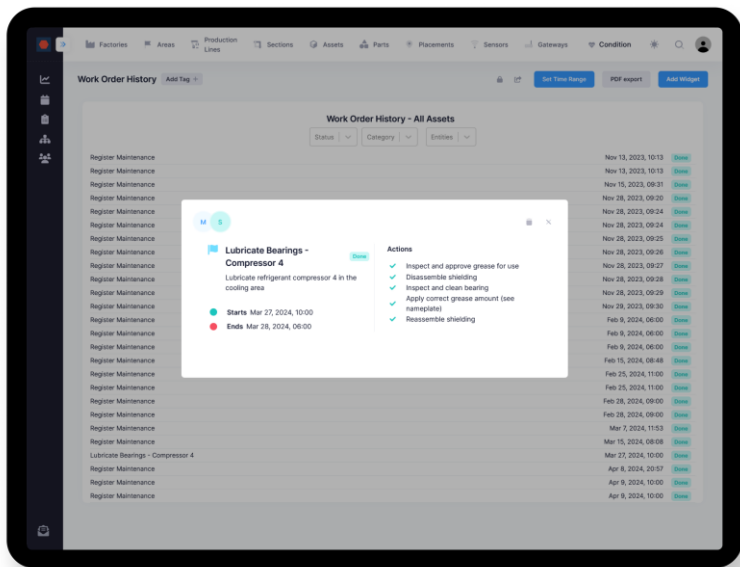

Proactive Maintenance Scheduling

- ✓ Set up **recurring maintenance plans** to keep your machinery running smoothly without guesswork.
- ✓ Maintenance plans can be based on actual equipment usage, ensuring service is done **right on time**.
- ✓ **Data-driven** preventive maintenance helps **prevent breakdowns**, keeping your production on track.
- ✓ Consistent care **prolongs the life of your machinery**, ensuring you get the most out of your investment.

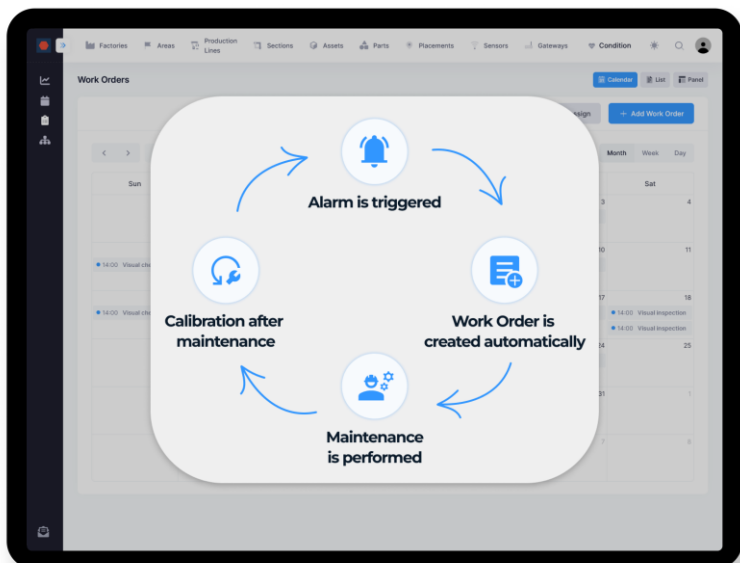

HEXASTATE:

Maintenance Insights Made easy

Log of History

- ✓ Every action taken on an asset is recorded, giving you a **full history** to reference anytime.
- ✓ Use historic data to **improve maintenance decisions** for the future.
- ✓ Maintain a detailed log to **demonstrate maintenance diligence** and asset care to stakeholders.
- ✓ With a complete history log, you're **always prepared** for internal reviews or external audits.

Work Order Integration

- ✓ Automatically initiate work orders **including corrective actions** when machine health worsens, ensuring a prompt maintenance response.
 - Work Orders can be triggered by multiple types of alarms or events.
- ✓ Simplify your maintenance workflows with **automated work order generation** from alarm signals.
- ✓ Increase the accuracy and efficiency of your maintenance operations by **automating responses to identified issues**, making sure nothing is missed.

We want to put an end to expensive solutions

At Hexastate, we believe that intelligent and efficient monitoring should be accessible to everyone.

In the past, monitoring even a single machine could be a costly endeavor. However, by leveraging the latest advancements in AI and IoT, we have made it possible for businesses across various industries to benefit from our innovative solutions.

Today's technology has reached a level of maturity where exceptional quality and accuracy can be achieved at a much more cost-effective price than just a few years ago.

Don't hesitate to contact us or schedule a brief discovery call to learn more about our solutions and how we can help you optimize operations while saving on costs.
