

**HEXASTATE:**

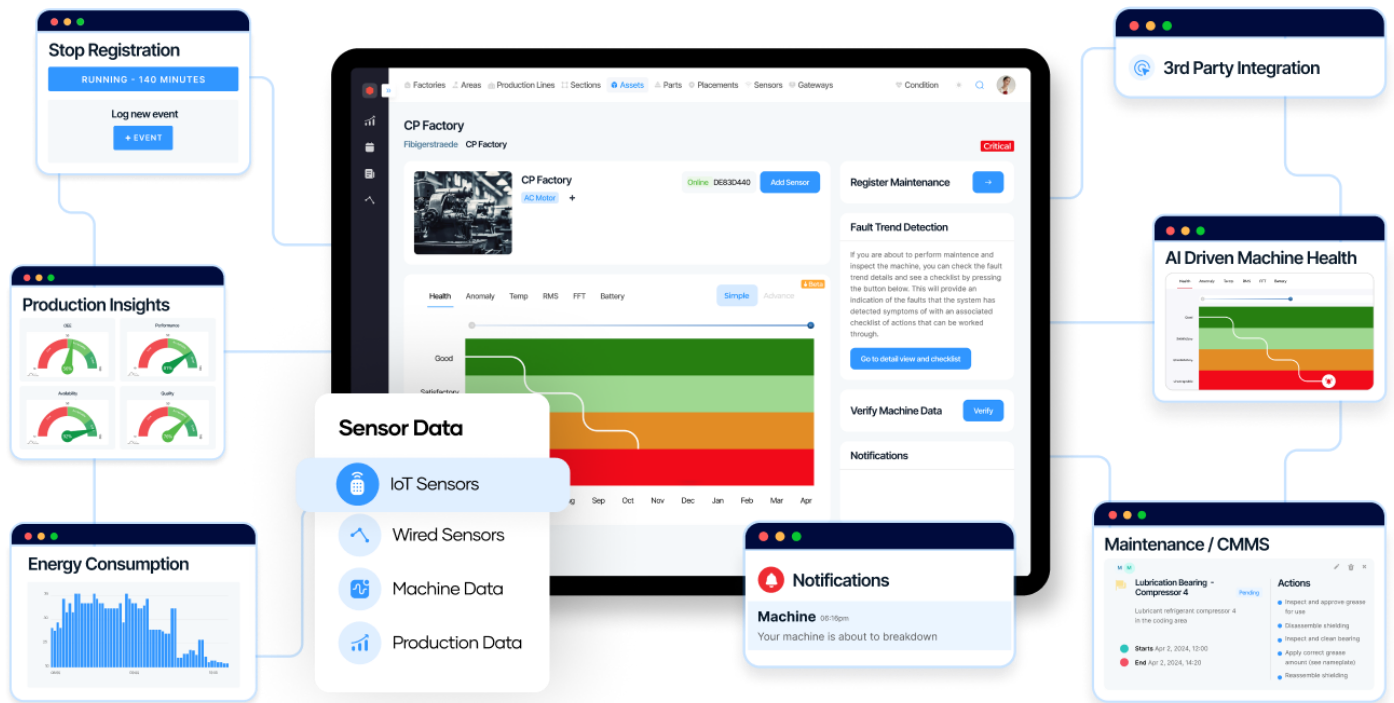

# **SMART SOLUTIONS**

**for Manufacturing Companies**

**Production Optimization**

# HEXASTATE:

## Our Mission: One platform for it all

Hexastate delivers smart automation technology, enhancing operational efficiency in industrial manufacturing with AI-driven monitoring, predictive maintenance, and strategic decision-making tools to reduce downtime and cut costs.

**Company**

Founded in 2018

**Core**

Intelligent software for manufacturing, facilities and utility

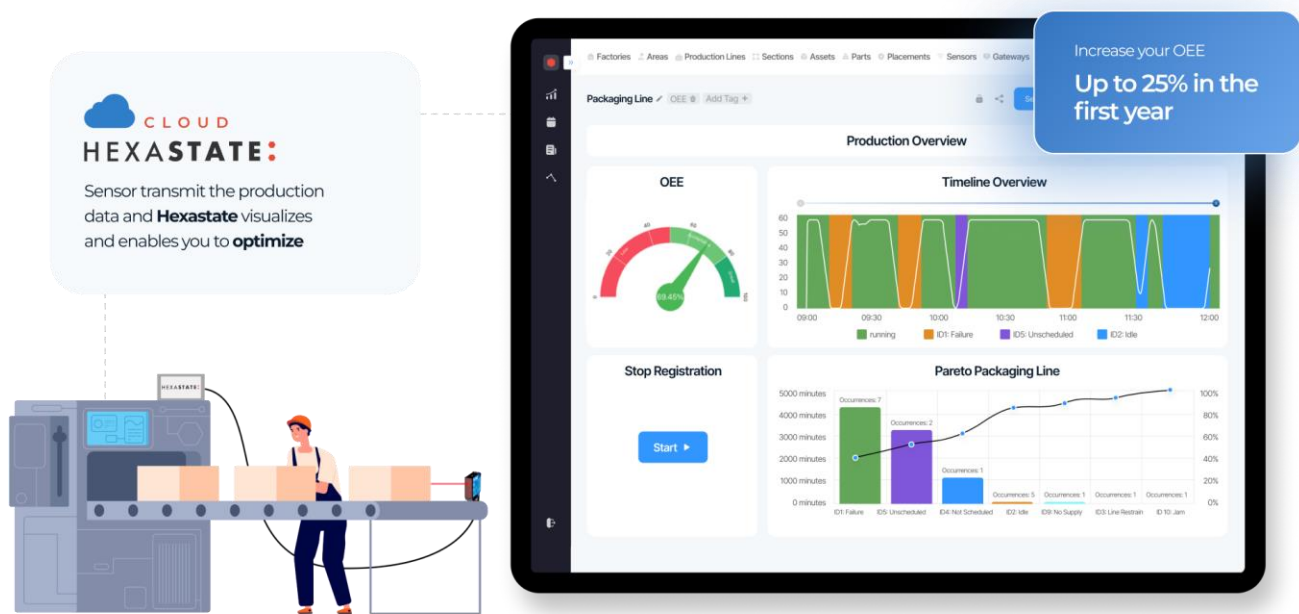

**Markets**

Scandinavia, Europe & UK, South America, USA, Asia

# HEXASTATE:

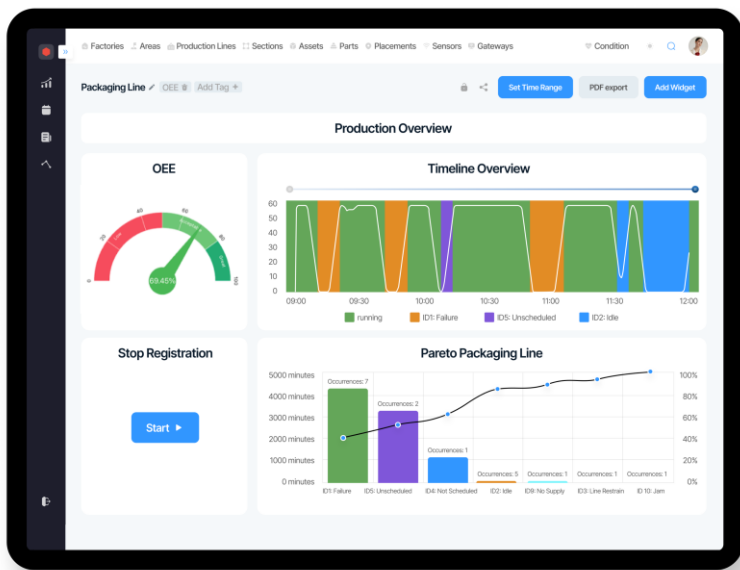

## Transform Data into Operational Performance

### Boost your production workflows through real-time performance insights.

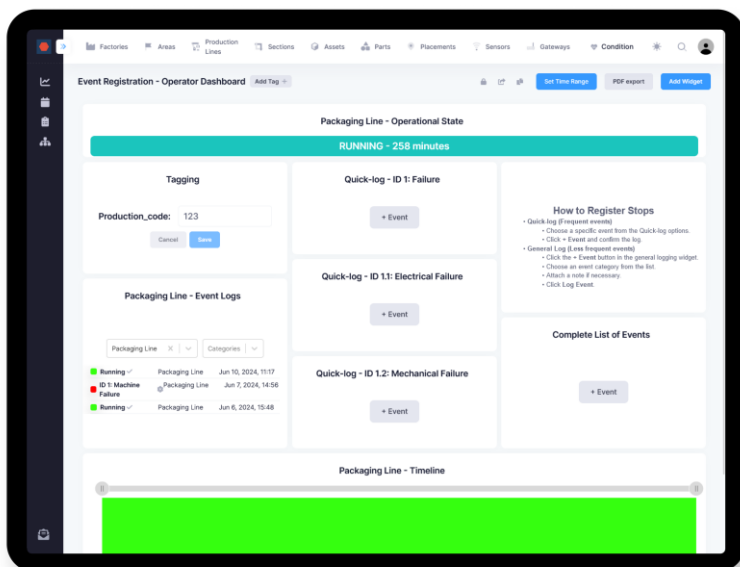

- ✓ Quickly **identify and address inefficiencies** with real-time monitoring.
- ✓ **Track and analyze downtime** to boost overall equipment effectiveness (OEE).
- ✓ **Detailed performance metrics** help refine processes to improve productivity.
- ✓ Comprehensive tools to **pinpoint and eliminate production bottlenecks**.
- ✓ **Improve operator workflows** and job satisfaction by providing them with clear insights and performance data.

# Performance Insights Anytime, anywhere

## Analysis of OEE metrics

- ✓ Advanced analytics helps you dive into OEE metrics and their related data, uncovering previously **hidden opportunities for improvement**.
- ✓ Track performance metrics over time to **forecast potential issues** and adjust processes preemptively.
- ✓ Pinpoint **exact causes of inefficiencies** to effectively target your corrective actions and eliminate issues.
- ✓ Detailed insights help **refine operations**, boost OEE scores, and enhance overall productivity and employee satisfaction.

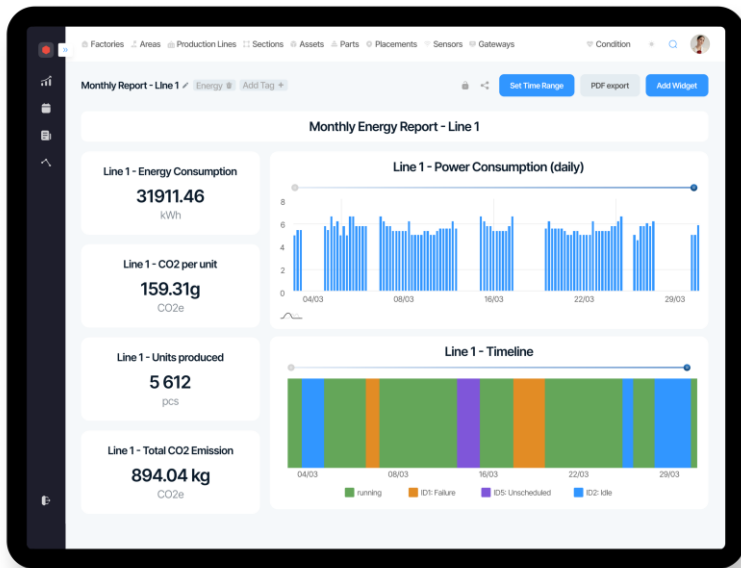

## Event/Stop Registration

- ✓ Hexastates event registration feature allows for **quick and easy logging** of events, with a user-friendly interface.
- ✓ Enable operators to **record the causes for downtime** immediately, enhancing troubleshooting capabilities, as well as documentation.
- ✓ **Empower your production data** with event registration, supporting the implementation of effective strategies.
  - For instance, combine events with energy data to understand the causes for excessive energy usage.

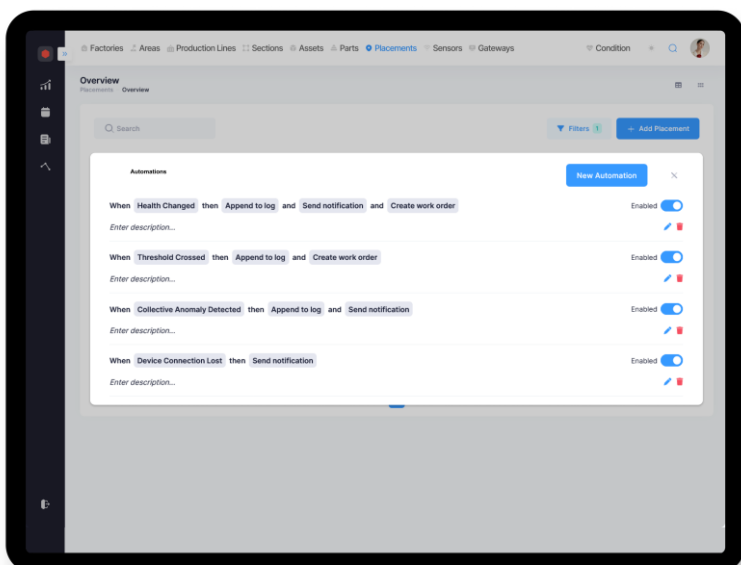

# HEXASTATE:

## Performance Insights Anytime, anywhere

### Dashboards and reports

- ✓ Equip managers with **comprehensive visualizations** of OEE data for making informed strategic decisions.
- ✓ Get the benefit of **quick responses to production issues**, with **live** operational data.
- ✓ **Benchmark internally** to guide continuous improvement and align team objectives.
- ✓ Identify inefficiencies and **reduce costs** through detailed, targeted insights.

### Automations

- ✓ **Keep track** of production data and **get notified** automatically in case of changes.
- ✓ Identify common issues and get alerted immediately to **prevent disruptions**.
- ✓ Set up automations for your workflows, to **provide specific, relevant insight**.
- ✓ Set up **automatic work orders** for your maintenance department for **quick responses** to critical events.
- ✓ Easily **adjust** automation settings to **adapt** to any production changes.

# HEXASTATE:

## Production Data Collection

### Wired Sensors

#### Easy setup, minimal disruption

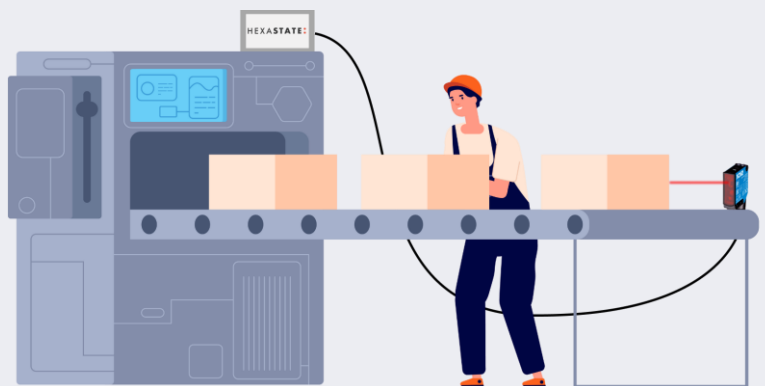

- ✓ Sensors are designed for a **quick setup process**, causing minimal disruption to business operations.
- ✓ **Non-intrusive**, seamless installation process with photoelectric sensors.
- ✓ Easily scale data collection **across facilities** as gateways can have up to 16 inputs.

#### Features

- Built-in **industrial 4G/LTE modem** ensures a reliable connectivity, anywhere in the world.
- Integrated pulse counter for **precise counting of products**, scrap or production line activity.
- Supports a **wide range** of photoelectric, capacitive, and inductive sensors for flexible data collection.\*

\*Retrofit adapters available for supporting data collection from existing process control sensors.

## We want to put an end to expensive solutions

At Hexastate, we believe that intelligent and efficient monitoring should be accessible to everyone.

In the past, monitoring even a single machine could be a costly endeavor. However, by leveraging the latest advancements in AI and IoT, we have made it possible for businesses across various industries to benefit from our innovative solutions.

Today's technology has reached a level of maturity where exceptional quality and accuracy can be achieved at a much more cost-effective price than just a few years ago.

Don't hesitate to contact us or schedule a brief discovery call to learn more about our solutions and how we can help you optimize operations while saving on costs.
